TITLE                   Directory of Public Schools Offering Technical  
Education Programs, Fiscal Year 1969.  
INSTITUTION           Office of Education (DHEW), Washington, D.C. Div. of  
Vocational and Technical Education.  
PUB DATE               Dec 69  
NOTE                   131p.  
  
EDRS PRICE             EDRS Price MF-\$0.75 HC-\$6.65  
DESCRIPTORS           Developmental Programs, \*Directories, Post Secondary  
Education, Pretechnology Programs, Supplementary  
Educational Centers, \*Technical Education,  
\*Technical Institutes

## ABSTRACT

This directory was prepared to provide information on technician education programs to vocational educators, employers, and cooperating agencies. It lists the names of public educational institutions, their locations, and their technical programs. The schools are listed alphabetically by municipality. Schools, programs, and some nontechnical programs reported by the States for the fiscal year 1969 are included. Types of courses and programs include secondary preparatory, Postsecondary preparatory, supplementary, and student development (pretechnical) for 1 year-or less. (Author/GP)

DISCRIMINATION PROHIBITED - Title VI of the Civil Rights Act of 1964 states: "No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance." Therefore any program or activity receiving financial assistance from the Department of Health, Education, and Welfare must be operated in compliance with this law.

## PREFACE

This directory was prepared to provide information on technician education programs to vocational educators, employers, and cooperating agencies.

It lists the names of public educational institutions, their locations, and their technical programs. The schools are listed alphabetically by States and within each State alphabetically by municipality. The program may or may not have been supported by Federal funds under the Vocational Education Act of 1963, as amended in 1968. The directory shows schools and programs reported by the States through various channels, or shown in publications, for fiscal year 1969. It is possible that some schools or programs may inadvertently have been excluded. A number of nontechnical programs reported by the States are also included.

Types of courses and programs are shown after each school entry. "S" designates a preparatory program at the secondary level, "PS" designates a postsecondary preparatory program, and "E" designates a supplementary course. The list of supplementary courses is probably incomplete because it is common practice to offer courses as requested in the community the school serves.

A preparatory program provides preemployment preparation to persons with little or no previous education or experience in the field of work being taught. Supplementary courses provide special instruction for persons who usually are employed and generally have had some experience in the work being taught.

Student Development (Pretechnical) programs are listed for the first time. Those which provide up to two semesters or three quarters of special, individualized, remedial, or compensatory preparation for students who need it to successfully master the technology of their choice are shown as Year, and those which are of less than an academic year are labeled Short.

The code used in the following pages is, therefore:

Secondary Preparatory Program	S
Postsecondary Preparatory Program	PS
Supplementary Program	E
<u>Student Development (Pretechnical)</u>	<u>Year</u>
or	
<u>Student Development (Pretechnical)</u>	<u>Short</u>

December 1969

Leon P. Minear, Director  
Division of Vocational  
and Technical Education
